Title (description)
Request for sudo privilege on guiness and monet

Problem
Need ability to bring these machines down and reboot if necessary. On more than one occasion during adverse weather/power conditions, it would have been useful to bring down the machines to guarantee no loss of data. Also, on numerous occasions it has been determined that the machines need to be rebooted - there are clearcase procedures where this is clearly necessary. Calling the helpdesk, we often have to wait 2-4 hours - which is downtime for all of PDPS.

Proposed Solution
Provide sudo password to Mike Bopf for guiness and to Simon Tackley for monet. The reason for rebooting can be clearly defined and limited to specific situations.
